

*Potential Signs Your Child Has Accessed Pornography on Your Computer*

- Pornographic pop-ups have started to appear on my computer for no apparent reason.
- My child has attempted to hide computer discs or USB drives from me.
- My child has changed what is on the computer screen quickly when I enter the room.
- My child has many computer files with the extensions “.gif” or “.jpeg.”
- I have noticed that my child is on the Internet late at night, including after everyone else has gone to bed.
- I have noticed unusual charges on my credit card bill that I cannot account for.
